Program Concept and Objectives:

The insurance and reinsurance industry across the globe is increasingly aware of the devastating effects of natural catastrophes like earthquakes, tsunamis, floods etc. in different parts of the world. The impact of man-made disasters has also hit the sector badly in recent times. All these changes have made it important for all insurance practitioners to develop at least a basic understanding of the concepts, emerging trends and practices relating to reinsurance business to maintain their relevance in the present day. This can help them in using reinsurance for effective risk management.

A better understanding of reinsurance helps insurance and reinsurance practitioners in seeking/ providing better insurance solutions to their customers. It would also help in more efficient claims settlements in case of any disastrous events.

Through this program, College of Insurance aims to provide a stronger theoretical framework to insurers and others involved in designing reinsurance arrangements and implementing them.

Key Takeaways from the program:

- Visit/Revisit the fundamentals of reinsurance
- Understand Reinsurance as a risk management tool
- Understand various kinds of Reinsurance arrangements
- Appreciate the terms and clauses of Reinsurance contracts
- Appreciate the current practices and trends in the global reinsurance market.

Participant Profile:

This two-day program is specially designed for insurance executives working in insurance, reinsurance and broking companies, whose roles require knowledge and skills relating to reinsurance.
