

Classroom Training Session on Fire Insurance - Standard Products (CT) 8th – 9th May, 2025

Program Concept and Objectives:

Fire/ Property insurance has always been an essential part of insurance portfolio for general insurers. Consequent to natural catastrophic events faced by the country in past few years, de-tariffing of the Fire portfolio causing a drop in the premium rates, and the stiff competition among the insurers, underwriters have considerable concerns about their projections of income and the profitability of the portfolio. Decisions related to risk assessment, risk selection and risk pricing have become more important in recent years. It has become essential for underwriters to focus on growth with profitability, and make insured aware of risk management concerns, to ensure the long-term success and sustainability of an insurance company.

The introduction of the standardized products by the IRDAI has added a new dimension to this scenario. It is essential for all stakeholders to stay informed about industry trends, emerging risks, and new technologies that may impact fire risks.

In this context, the College of Insurance aims to discuss the nuances of the Fire SFSP and the IRDAI mandated Standardized Property Insurance products with insurers, brokers, surveyors and agents etc. who deal in this line of business.

Key Takeaways from the program:

The program is designed for Fire/ Property insurance professionals for making them clear about the fundamentals of property insurance. The participants would be able to:

- Understand the fundamentals of Standard Products in Fire/ Property insurance
- Understand some important coverages and add-on covers
