

# College of Insurance Insurance Institute of India, Mumbai

## Virtual Training Session on Appreciation of Project Insurance – Customer Perspective (CVT-API) (On: 23<sup>rd</sup> September, 2024)

### Program Concept and Objectives:

Major Engineering Projects involve a lot of investment in terms of money, manpower and opportunity costs. Proper risk management and risk transfer are very important aspects for infrastructure projects. Minor instances of unprofessionalism in managing projects can have heavy untoward consequences for business enterprises. In many cases, despite having insurance policies in place, when an unfortunate event happens, business entities realize that they had not bought the correct insurance policies and add on covers, leaving them without adequate insurance protection.

In this context, College of Insurance designed this program for developing and updating the skills of the buyers of insurance from various industries.

COI has created '*Virtual Training (CVT) Rooms*' as a cost-effective mechanism for participants to equip themselves academically at their respective locations.

### Key Takeaways from the Program:

The program is designed to empower the buyers of Project Insurances in the following:

- Understanding the basics of Project Insurances such as Contractors' All Risks (CAR) and Erection All Risks (EAR)
- Understanding the importance of Risk Management in Projects
- Appreciating the coverages and terms offered under Project policies
- Appreciating the concept of Business Interruption and its importance
- Appreciating the issues and challenges in processing claims

### Participant Profile:

The Program is designed for the customers of Project Insurances. People working in various organizations in insurance purchasing roles, project financiers, project consultants, and brokers involved in Project Insurance are welcome to attend.

### Program Coordinator:

Mr Deepak Sangal
